Contents

Letters

Induced crystallization of amorphous silicon film in contact with aluminum 1
W. Cai and D. Wan (Sichuan, China)

Plasma-assisted chemical vapour deposition of diamond by hollow cathode arc discharge 4
J. Stiegler, K. Roth, K. Hammer and W. Scharff (Chemnitz, Germany)

Synthesis and Characterization

Characterization of TiO_2 films modified by platinum doping 7
L. Avalle, E. Santos, E. Leiva and V. A. Macagno (Cordoba, Argentina)

Effect of solvent on properties of sol–gel-derived TiO_2 coating films 18
L. Hu, T. Yoko, H. Kozuka and S. Sakka (Kyoto-Fu, Japan)

Evaluation of tetra-alkylchromium precursors for organometallic chemical vapor deposition. II: Unusual low temperature chromium carbide deposition from $Cr[C(CH_3)_3]_4$ 24
F. Maury (Toulouse, France) and F. Ossola (Padova, Italy)

Effect of substrate on growth of WS_2 thin films 30
M. Genut, L. Margulis, R. Tenne and G. Hodes (Rehovot, Israel)

Thermodynamic aspects of pyrite film formation by sulphur conversion of iron 37
G. Pimenta and W. Kautek (Berlin-Dahlem, Germany)

Serial cosputtering of mixed Al/Zr and Al_2O_3/ZrO_2 films 46
A. Belkind (Murray Hill, NJ, USA), R. Laird (Concord, CA, USA), Z. Orban and P. White Rafalko (Murray Hill, NJ, USA)

Anisotropic grain growth of δ-NiMo compound by exothermic solid state diffusional intermixing 52
T. C. Chou and T. G. Nieh (Palo Alto, CA, USA)

X-Ray characterization of Au/Ni multilayer thin films 63
J. Chaudhuri, S. M. Alyan (Wichita, KS, USA) and A. F. Jankowski (Livermore, CA, USA)

Growth and characterization of Nb/Gd multilayers for different substrate temperatures 69
C. Surgers and H. v. Löhneysen (Karlsruhe, Germany)

Hillock growth on aluminum and aluminum alloy films 80
S. Aceto, C. Y. Chang and R. W. Vook (Syracuse, NY, USA)

Surfaces, Interfaces and Colloidal Behaviour

Diffusion parameters for oxygen and gadolinium at gadolinium–metal interfaces 87
D. Raiser, C. Speisser and J. C. Sens (Strasbourg, France)

Metallurgical, Protective and Hard Layers

Determination of elastic modulus and thickness of surface layers by ultrasonic surface waves 92
D. Schneider, T. Schwarz and B. Schultrich (Dresden, Germany)

Kinetics of chemical vapor deposition of tungsten carbide 103
C. M. Kelly (Villanova, PA, USA), D. Garg and P. N. Dyer (Allenstown, PA, USA)

Diamond-like amorphous carbon films prepared by r.f. sputtering in argon: electron-assisted investigations 109
J. Ullmann, S. Schulze, J. Erben, W. Grünewald (Chemnitz, Germany), D. Heger (Freiberg, Germany) and I. Mühling (Chemnitz, Germany)

Influence of selected process parameters on the deposition of polymer-like amorphous hydrogenated carbon films in glow discharges 119
T. Danzer, G. Marx and G. Riedel (Chemnitz, Germany)

An investigation of the microfrictional behavior of C_{60} particle layers on aluminum 129
P. J. Blau and C. E. Haberlin (Oak Ridge, TN, USA)

Mechanics and Nanomechanics of Thin Layers

Internal stress, thermal expansion coefficient and bi-elastic modulus of photochemically vapour deposited hydrogenated amorphous silicon films 135
S. Guo and W. Wang (Shanghai, China)

On the chemical and mechanical properties of sputtered silicon nitride films 139
F. Jansen, A. Day (Murray Hill, NJ, USA) and L. Wamboldt (Concord, CA, USA)

Electronics, Optics and Opto-electronics

Formation and dissolution behaviour of ZrO_2 film in H_3PO_4 acid solutions 146
A. S. Mogoda, F. El-Taib Heakal and A. A. Ghoneim (Giza, Egypt)

Photoluminescence and Raman studies of CdS films grown by metal–organic chemical vapor deposition on Si{111} substrates 153
A. K. Berry (Fairfax, VA, USA), P. M. Amirtharaj (Fort Belvoir, VA, USA), J. T. Du (Fairfax, VA, USA), J. L. Boone and D. D. Martin (Rolla, MO, USA)

Optical properties of selective reflection TiN_x films 157
K. Antonova, G. Grigorov, I. Martev (Sofia, Bulgaria), V. Yakovlev and G. Zhizhin (Moscow, Russia)

Excimer laser ablated deposition of ferroelectric lead germanate thin films 162
C. J. Peng and S. B. Krupanidhi (Pennsylvania, PA, USA)

The effects of mercury UV photolysis on vapour deposition of SnO_2 170
C. H. Lee and S. H. Liu (Tainan, Taiwan)

A.c. impedance investigation of Ta_2O_5 film for use as a storage capacitor dielectric 176
A. Rešetić and M. Metikoš-Huković (Zagreb, Croatia)

Microstructure of polycrystalline $CuInSe_2$/Cd(Zn)S heterojunction solar cells 183
J. S. Chen, E. Kolawa, C. M. Garland, M. A. Nicolet and R. P. Ruiz (Pasadena, CA, USA)

An "all-gel" electrochromic device 193
N. Ozer, F. Tepehan and N. Bozkurt (Istanbul, Turkey)

Optical properties of evaporated small silver particles 199
M. H. Lee, P. J. Dobson and B. Cantor (Oxford, UK)

Structural and electrical properties of ion beam sputter deposited tantalum films 206
F. Sajovec, P. M. Meuffels and T. Schober (Jülich, Germany)

Langmuir–Blodgett, Biological and Related Films

Surface plasmon resonance as a probe of the complexing process of valinomycin Langmuir–Blodgett films by potassium ions 210
X. L. Yang, P. Dutta, G. K. Wong and J. B. Ketterson (Evanston, IL, USA)

Langmuir–Blodgett mono- and multilayers of fluorocarbon amphiphilic polymers and their application in photogalvanic metal–insulator–semiconductor structures 215
D. A. Znamersky (Moscow, Russia), R. G. Yusupov (Yaroslavl, Russia) and B. V. Mislavsky (Moscow, Russia)

Second harmonic generation in hemicyanine Langmuir–Blodgett monolayers deposited from aqueous subphase of halide salt solution 221
X. Liu, L. Liu, Z. Chen, X. Lu, J. Zheng and W. Wang (Shanghai, China)

Photo-induced regulation of nematic liquid crystal alignment by mixed monolayers of an azobenzene with long chain alkyl residues.. 226
K. Aoki (Hiroshima, Japan), Y. Kawanishi, T. Seki, T. Tamaki, M. Sakuragi (Ibaraki, Japan) and K. Ichimura (Yokohama, Japan)

Epitaxial growth of long chain esters prepared by physical vapour deposition 231
K. Yase (Tsukuba, Japan), M. Sano (Kobe, Japan) and S. Ogihara (Kanagawa, Japan)

Fabrication of organic–inorganic pseudosuperlattice 236
K. Orihara (Yonezawa, Japan)

Thin Film Devices, Sensors and Actuators

A method for the determination of the thermal transport properties of submicron-thick dielectric films with the use of an analytical expression 239
S. Ohkubo and M. Okuda (Kanagawa, Japan)

Interaction of NO_2 with copper phthalocyanine thin films. I: Characterization of the copper phthalocyanine films 244
S. Dogo, J. P. Germain, C. Maleysson and A. Pauly (Aubière, France)

Interaction of NO_2 with copper phthalocyanine thin films. II: Application to gas sensing 251
S. Dogo, J.-P. Germain, C. Maleysson and A. Pauly (Aubière, France)

Effects of substrate temperature, deposition pressure, and thickness on the morphology of ultrathin platinum film on SiO_2/Si substrate 257
R. N. Esfahani, G. J. Maclay (Chicago, IL, USA) and G. W. Zajac (Naperville, IL, USA)

Condensed Matter Film Behaviour

Energy considerations for preparing thin films by ion beam deposition 266
A. Jain (Bombay, India)

Monte Carlo simulation of high rate reactive sputtering of tin oxide in planar d.c. magnetron systems 270
C. D. Tsiogas and J. N. Avaritsiotis (Athens, Greece)
